

APPLICATION NOTE

MODELS 7225AC, 7425AC LINE-POWERED AC BRUSHLESS SERVO AMPLIFIERS WITH +/-10V ANALOG U-V INPUTS

4/10/00

INTERFACE DIAGRAM

CONTROLLERS

Several controllers are available that perform sinusoidal commutation. These controllers use the DSP in conjunction with double DAC analog outputs to perform multi-axis motion control. They are configured for several buss platforms such as PC, PC104, VME, and STD. For more information, about controllers, please contact the below manufacture.
